

My Journey

Student to Apprentice

**MORGAN
SINDALL**
CONSTRUCTION

This is Kye, who was recently a College student, *just like you*.

In September 2020, Kye joined Morgan Sindall as an Apprentice Quantity Surveyor and is studying at University to gain a Bachelor of Science in Quantity Surveying.

Kye, commenting on his journey with Morgan Sindall:

“Since I was young, I have always been fascinated by buildings, which led me to research different roles within the Construction industry near the end of my time at secondary school.

The first time I encountered Morgan Sindall was at a careers fair during the first year of college, where I met the Community Investment Advisor (Helen Clements), and she spoke about the range of opportunities Morgan Sindall has to offer.

I was advised to apply for this role by my progress and destination tutor at college. She gave me tips on how to improve my CV.”

Helen Clements, Community Investment Advisor at Morgan Sindall:

“It is a real pleasure when attending careers fairs that you meet people like Kye and talk to them about our opportunities. These conversations then open doors for them to be able to ask for more support.

With Kye, I supported with letting him know when the application process opened and tips for his CV. It makes me feel so proud to know that this engagement with education leads to people like Kye joining our teams as an apprentice.”

What is a Quantity Surveyor (QS)?

A QS is a construction industry professional that calculates the amount of materials needed for building work, and how much they will cost.

Employer comment:

“It is great to welcome Kye to the commercial team, who has settled in well. Kye has shown great potential and I’m sure he will be a valued addition to the business.

I am looking forward to seeing Kye’s career develop in the future.”

► *Talented people are key to our success*

A final word from Kye...

“It has been an exciting and interesting journey so far. Being able to switch between site and office makes my job varied and enjoyable, as I get to meet different people and learn things on site that develops my skills. I would recommend Morgan Sindall’s Apprenticeship to others, as you will earn while you learn and come out with a recognized qualification that you can be proud of.”
