

50+ CHOICES

New Anglia LEP is running a pilot project, funded through DWP, to work with employers with fewer than 250 employees, to review their policies and procedures in supporting and introducing the government's Fuller Working Lives agenda into their workplace.

We will be looking at the benefits of employing and supporting employees aged 50+. We will support you to review their skills and experience and

help to improve line management education to ensure employees do not need to leave the workforce before they wish to.

This project will support the employer to use the tool kit and work with employees within this age group to review health and wellbeing at work, their financial stability and skills and training that may benefit the individual to remain in work and contribute to the business.

This personal MOT aims to increase awareness, facilitate conversation, and encourage action to improve job prospects and have a positive contribution to business.

The project will provide links to National Careers Service, Money and Pensions Service as well as Public Health England. It will offer opportunities to look at recruitment, training, and the wellbeing of staff.
